Appendix B: Greater Tucson Region – Study Area Data

Data on the acreage and “Assessor’s Full Cash Value” of public lands within the Study Area are set forth in tabular form in this Appendix.

Table B-1: Public Land Areas, contains acreages for all public lands as identified and described within the text; these data are separated by jurisdiction and are disaggregated into 5-mile concentric rings extending out from the center of the proposed Rosemont Mine per Figure 1 of the body of the report.

Table B-2: Public Land Values, contains dollar values (expressed as “Assessor’s Full Cash Value”) for these public lands.

Data set forth in these tables was provided by Pima County.
