

FOURTH QUARTER 2014 RESULTS

HUBBAY

Management Presentation

February 20, 2014

Cautionary Information

This presentation contains "forward-looking statements" and "forward-looking information" (collectively, "forward-looking information") within the meaning of applicable Canadian and United States securities legislation. All information contained in this presentation, other than statements of current and historical fact, is forward-looking information. Often, but not always, forward-looking information can be identified by the use of words such as "plans", "expects", "budget", "guidance", "scheduled", "estimates", "forecasts", "strategy", "target", "intends", "objective", "goal", "understands", "anticipates" and "believes" (and variations of these or similar words) and statements that certain actions, events or results "may", "could", "would", "should", "might" "occur" or "be achieved" or "will be taken" (and variations of these or similar expressions). All of the forward-looking information in this presentation is qualified by this cautionary note.

Forward looking information includes, but is not limited to, the production, cost and capital and exploration expenditure guidance, the permitting, development and financing of the Rosemont project, production at Hudbay's Constanca, 777, Lalor and Reed mines processing at the company's Constanca concentrator, Flin Flon concentrator, Snow Lake concentrator and Flin Flon zinc plant, anticipated timing of the company's projects and events that may affect its projects, including the anticipated issue of required licenses and permits, the anticipated effect of external factors on revenue, such as commodity prices, anticipated exploration and development expenditures and activities and the possible success of such activities, estimation of mineral reserves and resources, mine life projections, timing and amount of estimated future production, reclamation costs, economic outlook, government regulation of mining operations, and business and acquisition strategies. Forward-looking information is not, and cannot be, a guarantee of future results or events. Forward-looking information is based on, among other things, opinions, assumptions, estimates and analyses that, while considered reasonable by Hudbay at the date the forward-looking information is provided, inherently are subject to significant risks, uncertainties, contingencies and other factors that may cause actual results and events to be materially different from those expressed or implied by the forward-looking information.

The material factors or assumptions that Hudbay identified and were applied by the company in drawing conclusions or making forecasts or projections set out in the forward looking information include, but are not limited to: The successful ramp up of production at Constanca; the success of mining, processing, exploration and development activities; the accuracy of geological, mining and metallurgical estimates; the costs of production; the supply and demand for metals Hudbay produces; no significant and continuing adverse changes in financial markets, including commodity prices and foreign exchange rates; the supply and availability of reagents for Hudbay's concentrators; the supply and availability of concentrate for Hudbay's processing facilities; the supply and the availability of third party processing facilities for Hudbay's concentrate; the supply and availability of all forms of energy and fuels at reasonable prices; the availability of transportation services at reasonable prices; no significant unanticipated operational or technical difficulties; the execution of Hudbay's business and growth strategies, including the success of the company's strategic investments and initiatives; availability of additional financing, if needed, under Hudbay's standby credit facility for Constanca and the company's corporate credit facility; the availability of financing for Hudbay's exploration and development projects and activities; the ability to complete project targets on time and on budget and other events that may affect Hudbay's ability to develop its projects; the timing and receipt of various regulatory and governmental approvals; the company's ability to complete the closing of its revised \$250 million corporate credit facility the availability of personnel for Hudbay's exploration, development and operational projects and ongoing employee relations; Hudbay's ability to secure required land rights to complete its Constanca project; maintaining good relations with the communities in which we operate, including the communities surrounding Hudbay's Constanca and Rosemont projects and First Nations communities surrounding the company's Lalor and Reed mines; no significant unanticipated challenges with stakeholders at Hudbay's various projects; no significant unanticipated events or changes relating to regulatory, environmental, health and safety matters; no contests over title to Hudbay's properties, including as a result of rights or claimed rights of aboriginal peoples; the timing and possible outcome of pending litigation and no significant unanticipated litigation; certain tax matters, including, but not limited to current tax laws and regulations and the refund of certain value added taxes from the Canadian and Peruvian governments; and no significant and continuing adverse changes in general economic conditions or conditions in the financial markets.

Cautionary Information (continued)

The risks, uncertainties, contingencies and other factors that may cause actual results to differ materially from those expressed or implied by the forward-looking information may include, but are not limited to, risks generally associated with the mining industry, such as economic factors (including future commodity prices, currency fluctuations, energy prices and general cost escalation), uncertainties related to the development and operation of Hudbay's projects (including risks associated with the commissioning and ramp up of the Constancia project), depletion of the company's reserves, dependence on key personnel and employee and union relations, risks related to political or social unrest or change and those in respect of aboriginal and community relations, rights and title claims, operational risks and hazards, including unanticipated environmental, industrial and geological events and developments and the inability to insure against all risks, failure of plant, equipment, processes, transportation and other infrastructure to operate as anticipated, compliance with government and environmental regulations, including permitting requirements and anti-bribery legislation, volatile financial markets that may affect the company's ability to obtain financing on acceptable terms, the development of the Rosemont project not occurring as planned, any material inaccuracy in Augusta's historical public disclosure and representations in the support agreement upon which the company's offer to acquire Augusta was predicated, the failure to obtain required approvals or clearances from government authorities on a timely basis, uncertainties related to the geology, continuity, grade and estimates of mineral reserves and resources, including the historical estimates of mineral reserves and resources at the Rosemont project, and the potential for variations in grade and recovery rates, uncertain costs of reclamation activities, the company's ability to comply with its pension and other post-retirement obligations, the company's ability to abide by the covenants in its debt instruments or other material contracts, tax refunds, hedging transactions, as well as the risks discussed under the heading "Risk Factors" in the company's MD&A for the three and six months ended June 30, 2014 and the company's most recent Annual Information Form.

Should one or more risk, uncertainty, contingency or other factor materialize or should any factor or assumption prove incorrect, actual results could vary materially from those expressed or implied in the forward-looking information. Accordingly, you should not place undue reliance on forward-looking information. Hudbay does not assume any obligation to update or revise any forward-looking information after the date of this presentation or to explain any material difference between subsequent actual events and any forward-looking information, except as required by applicable law.

Cautionary Information (continued)

The technical and scientific information in this presentation related to the Constancia project has been approved by Cashel Meagher, P. Geo, Hudbay's Vice-President, South America Business Unit. The technical and scientific information related to all other sites and projects contained in this presentation has been approved by Robert Carter, P. Eng, Hudbay's Director, Technical Services. Messrs. Meagher and Carter are qualified persons pursuant to NI 43-101. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates of scientific and technical information may be affected by any known environmental, permitting, legal title, taxation, sociopolitical, marketing or other relevant factors, please see the Technical Reports for Hudbay's material properties as filed by Hudbay on SEDAR at www.sedar.com.

The disclosure in this presentation uses mineral resource classification terms and mineral resource estimates that comply with NI 43-101. NI 43-101 establishes standards for all public disclosure a Canadian issuer makes of scientific and technical information concerning mineral projects. Unless otherwise indicated, all reserve and resource estimates contained herein have been prepared in accordance with NI 43-101. These standards differ significantly from the mineral reserve disclosure requirements of the SEC set forth in Industry Guide 7. Consequently, reserve and resource information contained herein is not comparable to similar information that would generally be disclosed by U.S. companies in accordance with the rules of the SEC.

In particular, the SEC's Industry Guide 7 applies different standards in order to classify mineralization as a reserve. As a result, the definitions of proven and probable reserves used in NI 43-101 differ from the definitions in SEC Industry Guide 7. Under SEC standards, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made. Among other things, all necessary permits would be required to be in hand or their issuance imminent in order to classify mineralized material as reserves under the SEC standards. Accordingly, mineral reserve estimates referred to herein may not qualify as "reserves" under SEC standards.

In addition, the terms "measured mineral resources," "indicated mineral resources" and "inferred mineral resources" are used to comply with the reporting standards in Canada. The SEC's Industry Guide 7 does not recognize mineral resources and U.S. companies are generally not permitted to disclose resources in documents they file with the SEC. Investors are specifically cautioned not to assume that any part or all of the mineral deposits in these categories will ever be converted into SEC defined mineral reserves. Further, "inferred resources" have a great amount of uncertainty as to their existence and as to whether they can be mined legally or economically. Therefore, investors are also cautioned not to assume that all or any part of an inferred resource exists. It cannot be assumed that all or any part of "measured mineral resources," "indicated mineral resources," or "inferred mineral resources" will ever be upgraded to a higher category. Investors are cautioned not to assume that any part of the reported "measured mineral resources," "indicated mineral resources," or "inferred mineral resources" contained herein is economically or legally mineable. For the above reasons, information contained herein containing descriptions of mineral reserve and resource estimates is not comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements of the SEC.

Achievements and Challenges

ACHIEVED GROWTH OBJECTIVES IN 2014

<p>Production</p>		<p>777</p>	<ul style="list-style-type: none"> ✓ Copper production and operating cost guidance achieved ☑ 2014 zinc and precious metal production below guidance
<p>Ramp-Up</p>		<p>Reed</p>	<ul style="list-style-type: none"> ✓ Commercial production achieved ahead of guidance and under budget
		<p>Lalor</p>	<ul style="list-style-type: none"> ✓ Achieved commercial production on time and under budget; commissioned upgraded Snow Lake concentrator ✓ Underground exploration drilling began in 2014
		<p>Constancia</p>	<ul style="list-style-type: none"> ✓ Achieved initial concentrate production in Q4 2014 ✓ On schedule for commercial production in Q2 2015 and full capacity expected in H2 2015
<p>The Next Phase of Growth</p>			
<p>Feasibility & Permitting</p>		<p>Rosemont</p>	<ul style="list-style-type: none"> • High-quality development project • Complementary to existing portfolio • Sequences well with Constancia • Well-established infrastructure

Near-Term Production Growth¹

OPPORTUNITY FOR A RE-RATE IS SIGNIFICANT AS WE DELIVER GROWTH

320% Increase in Cu Production

145% Increase in Au-Eq. Production²

50% Increase in Zn Production

- 777⁴
- Lalor⁵
- Constancia⁶
- Reed⁷

1. Represents production growth from 2014 actual production to 2016 anticipated production levels.
2. Au-Eq. production includes production subject to streaming transactions. Silver converted to gold at a ratio of 60:1 for 2015 guidance. For 2014 production, silver converted to gold at 60.5:1, based on estimated 2014 realized sales prices.
3. 2015 estimated production levels based on midpoint of 2015 production guidance released on January 15, 2015.
4. 777's anticipated production for 2016 is based on contained metal in concentrate as disclosed in "Technical Report 777 Mine, Flin Flon, Manitoba, Canada" dated October 15, 2012.
5. Lalor's anticipated production for 2016 is based on contained metal in concentrate as disclosed in "Pre-Feasibility Study Technical Report, on the Lalor Deposit" dated March 29, 2012.
6. Constancia's anticipated production for 2016 is based on contained metal in concentrate as disclosed in, "The Constancia Project, National Instrument 43-101 Technical Report", filed on November 6, 2012.
7. Reed's anticipated production for 2016 is based on contained metal in concentrate as disclosed in, "Pre-Feasibility Study Technical Report on the Reed Copper Deposit" dated April 2, 2012 and reflects 100% attributable production to Hudbay.

Strong Financial Capacity

- > Commitments received to increase corporate revolving credit facility to US\$250 million
- > More than sufficient to meet \$425 million 2015 capital budget; exclusive of operating cash flow

Pro-Forma Liquidity ¹	(In C\$ millions)
Cash and cash equivalents	207
Corporate revolving credit facility ²	290
Less: amount drawn on corporate revolving credit facility	(64)
Constancia standby credit facility ³	174
Total	607

1. Pro-forma liquidity including cash balances as of December 31, 2014; assumes USD/CAD conversion rate of 1.16

2. Hubday has received commitments from a syndicate of Canadian banks, including its current lenders, to increase the size of the company's corporate revolving credit facility from US\$100 million to US\$250 million.

3. Exclusive of initial drawdown of US\$81.5 million, which occurred on February 3, 2015

COMMERCIAL PRODUCTION ON TRACK FOR Q2 2015; FULL CAPACITY IN H2 2015

- > Copper concentrate production began as expected in Q4 2014
- > Commissioning is ongoing and copper concentrate produced to date has met specifications; first concentrate shipment expected in late Q1 2015
- > Initial mining of softer supergene ore expected to average 30% above reserve grade in first five years of mine life
- > Mining and civil earthworks productivity have been at or above expectations; significant quantity of ore available for processing

Constancia tailings management facility

Constancia tailings thickener

Constancia Photos

Constancia primary crusher and crushed ore

Crushed ore travelling on stockpile conveyors

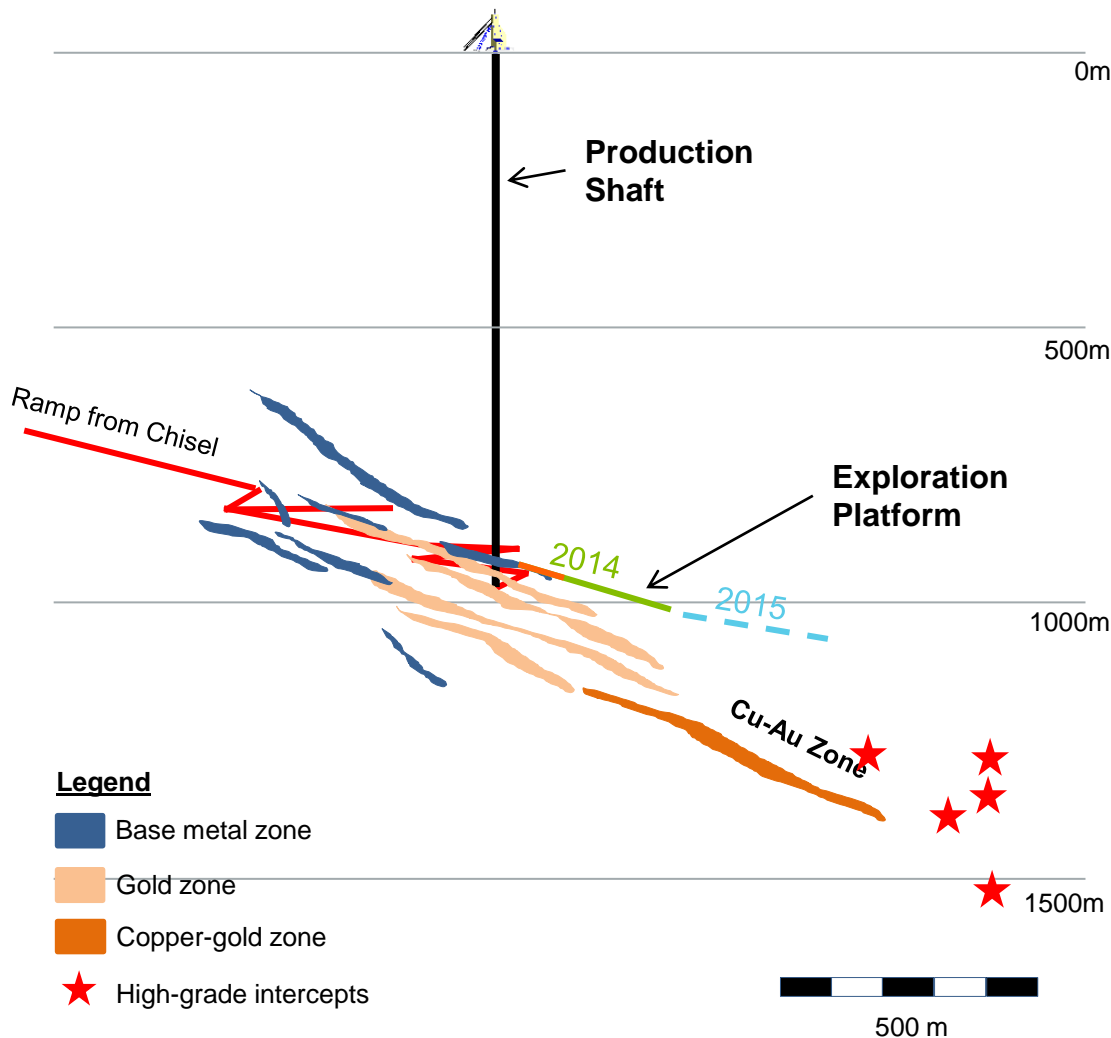

Constancia flotation cells

Constancia mill

DRILLING OF CU-AU ZONE COMMENCED IN Q4 2014

Lalor Cross-Section with Exploration Platform

Underground drill program underway

- > Test down plunge potential of gold and copper-gold zones
- > Determine optimal location to advance exploration ramp and to develop additional drilling platforms
- > Upgrade inferred resources

80%-OWNED¹ COPPER PROJECT IN ARIZONA, USA

Hudbay acquired control of the Rosemont project in July 2014

- > Completed 43 hole confirmatory drill program with approx. 30,000 metres drilled
- > Metallurgical test program has begun; basic engineering review is underway
- > Project permitting efforts ongoing; Clean Water Act Section 401 Water Quality Certification issued

Crusher area of the Rosemont project (looking east)

Pit area of the Rosemont project (looking southwest)

1. Hudbay's ownership in the Rosemont project is subject to an earn-in agreement with United Copper & Moly LLC ("UCM"), pursuant to which UCM has earned a 7.95% interest in the project and may earn up to a 20% interest

HARVESTING RETURNS FROM NOW COMPLETED CAPITAL INVESTMENT

- > Complete commissioning at Constancia and ramp-up toward commercial production in Q2 2015
- > Optimize production and cost performance at Manitoba operations
- > Continue exploration program including drilling from Lalor underground exploration drift
- > Advance permitting and technical work at Rosemont

Night view of Constancia crusher
