To: Michael Romero <mromero@azland.gov>

Thank you. I noticed that the agenda is available online but the attachment with specific applications is not. Do you have an estimate of when that might be available? I guess I am asking if you can confirm that we will be on the agenda?

Cheers.

Once the Board of Appeals approves of the ROW, can you provide us with a copy of the ROW document for our review prior to execution by your office?

No, the Board only reviews the value.
I can change the description in our system

I just left you a voicemail. The description does not match the current projected uses of the right of way. Our application provides for 3 above-ground pipelines and we expect to have 3 above-ground pipelines for tailings, sand, reclaimed water and other uses. Do these need to be included in the recommendations being described to the Board?

Robin-

The signature page is missing from the attachment.
What the Board will review is attached.
Most Board members attend electronically these days.

Michael:

Attached as requested, is the fully executed Notice of Appraisal dated November 23, 2022.

Couple of questions:

1. Can you provide us with a copy of the form of ROW you will be presenting to the Board of Appeals for our perusal prior to the upcoming meeting?
2. Do a majority of the Board members attend the meeting electronically or in person?

Cheers.
